

Eye Watch health information and resources your clients need!

After completing the Eye Watch Training Program you will be able to:

- Provide presentations on accessing eye care resources
- Educate your clients about age related eye diseases such as glaucoma, age related macular degeneration and diabetic retinopathy
- Teach the people you serve how to live a healthy lifestyle to preserve their sight
- Create eye health displays
- Provide educational materials that will help your clients
- Insert articles in your organization's newsletter about vision health

Eye Watch Presenter Training

The goal of the Eye Watch Program is to decrease the incidence of preventable vision loss among Ohio's seniors through promotion of healthy lifestyles, early detection and treatment.

The Eye Watch Program is enhancing the services of Ohio's senior care and public health networks by providing coordinated information and access to prevention information, referral, and treatment resources for aging eye challenges.

After completing the program, participants will be able to provide their professional and consumer constituent base with facts and information about what they can do to prevent vision loss.

Prevent Blindness Ohio (PBO) has developed an Eye Watch Toolkit to support presenter trainees. The toolkit contains a compact disc with three PowerPoint presentations: *Living Well to See Well, Understanding Age-Related Eye Diseases, and Understanding Your Resources*. The toolkits also contain handouts, brochures, and questionnaires to support each of the presentations. Trainees will be able to use the resources in their existing organizational networks to educate their constituents about the steps seniors can take to maintain healthy vision.

SIGN UP TODAY!

Several workshops on the use of the Eye Watch toolkits are available throughout Ohio. Register today for one of these FREE training sessions that will prepare you to educate your constituents about how to maintain healthy vision for a lifetime.
